PROFESSIONAL SUMMARY

Proactive and detail-oriented Computer Engineering graduate with a strong passion for Network Security, Ethical Hacking. Gained extensive practical experience in vulnerability assessment, penetration testing, Linux environments, and secure software development life cycles through multiple professional internships. Proven ability to analyze complex systems, containerize workflows, and automate tasks using Python and Java frameworks.

WORK EXPERIENCE

Penetration Tester Intern

July 2026 – Present

SiberTim

Ankara, Turkey (On-site)

- Conducting advanced penetration testing methodologies and web application vulnerability assessments.
- Identifying and analyzing critical security vulnerabilities, including Cross-Site Scripting (XSS) and injection flaws, using tools like OWASP ZAP and Nessus.
- Executing daily cybersecurity tasks, technical documentation, and vulnerability reporting under rigorous engineering supervision.

English Tutor (Freelance)

September 2025 – Present

Preply

Online

- Conducting specialized, personalized one-on-one English language sessions for diverse international students, tailoring pedagogies to individual pacing and professional goals.

IT Technician (Part-Time)

November 2025 – June 2026

Atatürk University, Open Education Faculty

Erzurum, Turkey (On-site)

- Provided Tier-1 and Tier-2 technical support to faculty staff, diagnosing and resolving intricate hardware, network connectivity, and software configuration anomalies.

Cybersecurity Intern

January 2025 – May 2025

Secure Computing

Istanbul, Turkey (Remote)

- Integrated security principles into the software development lifecycle by implementing comprehensive unit testing strategies using Jest, reducing code defects and bugs by 25% prior to production.
- Designed and built a responsive web interface for the Nmap tool leveraging JavaScript, React, and MongoDB to streamline vulnerability scan visualization.

Cybersecurity Intern

November 2023 – March 2024

BG-TEK

Bursa, Turkey (Remote)

- Conducted comprehensive network reconnaissance, scanning, and packet analysis utilizing Nmap and Wireshark, identifying 15+ high-risk vulnerabilities.
- Performed structured penetration testing across legacy web applications, discovering and reporting critical security vulnerabilities.
- Utilized Burp Suite proxy tools to enhance intercepted web request security assessments, boosting vulnerability detection speeds by 20%.

Software Developer Intern

September 2022 – May 2023

BG-TEK

Bursa, Turkey (Remote)

- Developed, optimized, and maintained full-stack web applications using PHP, JavaScript, and corporate backend frameworks.
- Containerized full-stack web application deployments using Docker, streamlining the CI/CD development pipeline and reducing environment deployment times by 40%.
- Designed, modeled, and optimized complex MySQL relational databases to guarantee highly efficient data storage, indexing, and rapid query execution.

PROJECTS

Cybersecurity Serious Game (Human Firewall Sim)

Unity, C#

- Architected and developed an interactive serious simulation game aimed at enhancing corporate and individual user cybersecurity awareness.
- Implemented gaming mechanics to simulate real-world social engineering and phishing vectors.

AI Body Fat Scanner Mobile Application

Python, AI, Mobile Frameworks

- Developed an AI-driven mobile application that calculates and monitors user body fat percentages through predictive computer vision models, optimizing client-side processing.

EDUCATION

Bachelor of Science in Computer Engineering

September 2022 – June 2026

Atatürk University

Erzurum, Turkey

- **Curriculum Emphasis:** Software Development Lifecycle (SDLC), Advanced Network Architecture, Information Systems Security, and Relational Databases.
- **Google Developer Groups (GDG):** Served as a Core Team Member, managing, planning, and organizing large-scale technology workshops, community events, and technical networking sessions.

SKILLS

Languages: Python, JavaScript, PHP, C, SQL

Frameworks & Tech: Node.js, Docker, MySQL, MongoDB, Git

Cybersecurity: Burp Suite, Nmap, Wireshark, OWASP ZAP, Nessus, Splunk (SIEM), Kali Linux Tools

Methodologies: Penetration Testing, Vulnerability Assessment, Endpoint Security, MITRE ATT&CK Framework, Network Reconnaissance

COURSES & CERTIFICATIONS

- **Cyber Security SOC Analyst Training:** SIEM (Splunk) (80 Hours) - Udemy
- **SOC Analyst Training:** (5 Months) - Cisco & Akbank
- **Cyber Security Training:** (50 Hours) - Techcareer.net

LANGUAGES

- **Turkish:** Native Speaker
- **English:** C1 Advanced Professional Proficiency (Active Online Tutor)
